Subject: TPC - South 4 Group Fire update to DOI/FWS

Good morning all,

Unified Command received word this morning of the observance of approximately 100 – 300 small fish in the drainage canal upstream from Port Neches Atlantic Road. TPC will be providing a formal update with photos.

TPC also contacted and activated Wildlife Response Services (Rhonda Murgatroyd) to support the response.

Still no impact to the Neches River. Furthest downstream sheen is approximately 1.3 miles from the river and approximately 1.89 miles from the 201 outfall.

UC was notified at approximately 1700 on 11/30/19, that there was no further incident related discharge from the 201 outfall. All Site firewater and stormwater are presently routed to the joint waste water treatment facility.

Any questions, please don't hesitate.

TCEQ, TGLO, and TPW are also notified. This photo was provided by USCG.

VR,
Adam
